

YAMAHA PSR-48

Thank you for purchasing the Yamaha PSR48 VST instrument.

Many of you may have started out on this superb keyboard & the VST will take you right down nostalgia lane. The PSR48 has 100 PCM sounds and a drum kit. All sounds and the drum kit have been multisampled for accuracy and the VST comes in 2 parts. You get both parts for the one price. Even though the sounds are classed as 'entry level', they are inspiring patches and can be integrated into any producers setup. In the VST you can change from polyphonic to monophonic, use glide, adjust LFO, manipulate the ADSR and the reverb brings the sounds to life.

NOTE: Please place the included fonts into your 'FONTS' folder on your computer. This will show the correct display like what is shown above.

To Install the VSTi: Place the entire folder into your VST plugins folder. Don't remove anything from the folder. When you then start your DAW, copy & paste the serial number making sure you have not copied any spaces at the end. It will then automatically be integrated within your setup.

I hope you enjoy this VSTi release.

We are always interested in hearing any productions where you use any of our instruments or samples. Send us a link to info@beatmachine.co.uk or find us on Sound Cloud as Beat Machine Drum Sample Packs.

Finally, may we ask you to please not illegally share, duplicate or modify this instrument in any way. Illegal distribution will only jeopardise future releases. Thank you.
